

Adya Clarity • Solutions for Life

Adya Clarity is a dissolved ionic mineral salt. It is a magnetic sulfate mineral solution that is extracted through an acid sulfate process from one of the rarest, and most mineral rich Biotite or Black Mica sources on earth.

Adya Clarity's function is to eliminate dissolved contaminants within your water making the toxins harmless. Adya Clarity has the ability to convert dissolved contaminants into burned-up, inert matter.

With over 100 trace minerals in soluble form, Adya Clarity also provides the body with one of the most complete mineral matrices that Nature has to offer.

Water today has many challenges.

Thankfully, Adya Clarity goes to work on your water to improve it in many ways. The result is

great tasting water that is mineral rich, hydrating, and detoxifying with these benefits:

- Bacteria (4 types Ecoli) and molds are eliminated
- Impurities are rendered inert
- Oxygen is activated
- Greatly reduces or eliminates Heavy metals, Chlorine
- Changes Sodium Fluoride to Calcium Fluoride
- Frequency and energy are raised.

This ionic solution is so powerful, we have been able to provide 3rd world countries the ability to sanitize and purify some of the most contaminated water on this Earth.

HOW TO USE ADYA CLARITY

Adya Clarity is formulated to be mixed into water. Once mixed with water, the minerals dissolve and become part of the water.

Adya Clarity minerals work to purify the water. Dissolved contaminants which exist in the water become visible. They then sink to the bottom of the glass or container and never mix back into the water. In other words, while in this water, they can never dissolve again. In distilled water there should be no dissolved contaminants, therefore, there should be no precipitation. Unfortunately, almost all other waters such as tap, rivers, lakes, ponds, spring and even most bottled waters show signs of dissolved contaminants. Adya Clarity is amazing at revealing contamination along with making the water safer, cleaner, and healthier to drink.

In this way, Adya Clarity is used to clean-up the impurities in water and is an outstanding source for a complete matrix of minerals.

Adya also offers a unique gravity-fed filtration system to catch the precipitated matter that has separated from the water.

Adya Clarity Product List

Adya Clarity 2 oz. This 2 oz. dropper bottle of Adya Clarity, Magnetic Ionic Minerals is great to carry along with you. Transforms approximately 15 gallons of water into living, oxygenated, fresh tasting mineral water. Add 5 – 10 drops to 8 ounces of water and stir.

Adya Clarity 16 oz. This 16 oz. Adya Clarity, Magnetic Ionic Minerals transforms approximately 120 -150 gallons of water into living, oxygenated, fresh tasting mineral water. Add 1 teaspoon to a gallon of water and stir.

Adya Clarity 32 oz. This 32 oz. Adya Clarity, Magnetic Ionic Minerals transforms approximately 240 -300 gallons of water into living, oxygenated, fresh tasting mineral water. Add 1 teaspoon to a gallon of water and stir.

Adya Water Filtration Unit *With 16 oz. Adya Clarity*

This free-standing, no electricity needed, gravity water filtration system includes an 0.2 micron ceramic filter, a multi-level filter of raw earth including activated carbon, and zeolites, as well as a 16 ounce bottle of Adya Clarity.
